

Will it be 'good enough for Government work' in 2020?

**For: Digital Hydrography on the Maritime Web –
Session 3: Innovation**

HMS ECHO Libya 2013

Where are we now?

Is Defence different?

Customer

But ... I need to avoid this...

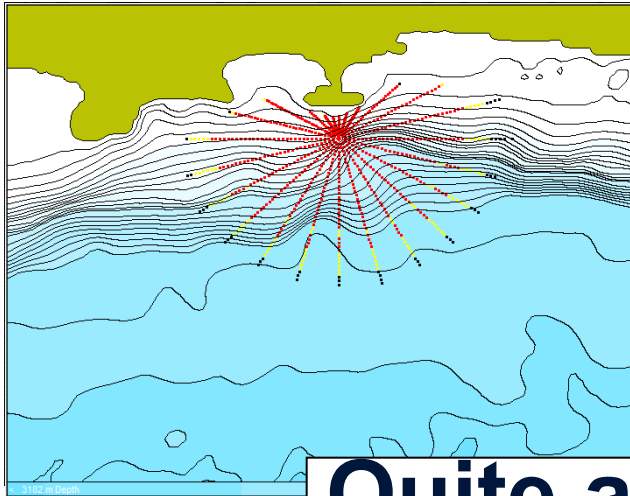

Yes - Tax payer value but
Crowd sources and Sat Bathy
– good enough?

Do our customers understand the risks

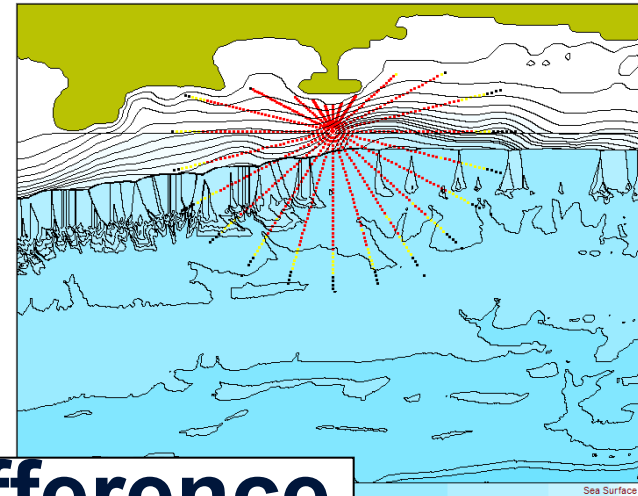

Added value

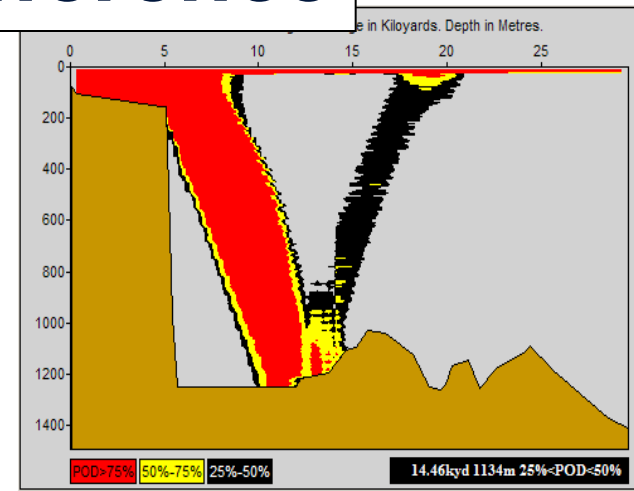

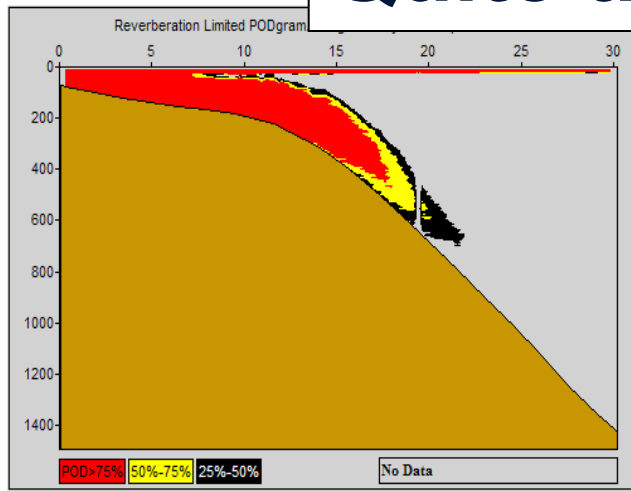

Low resolution

High resolution

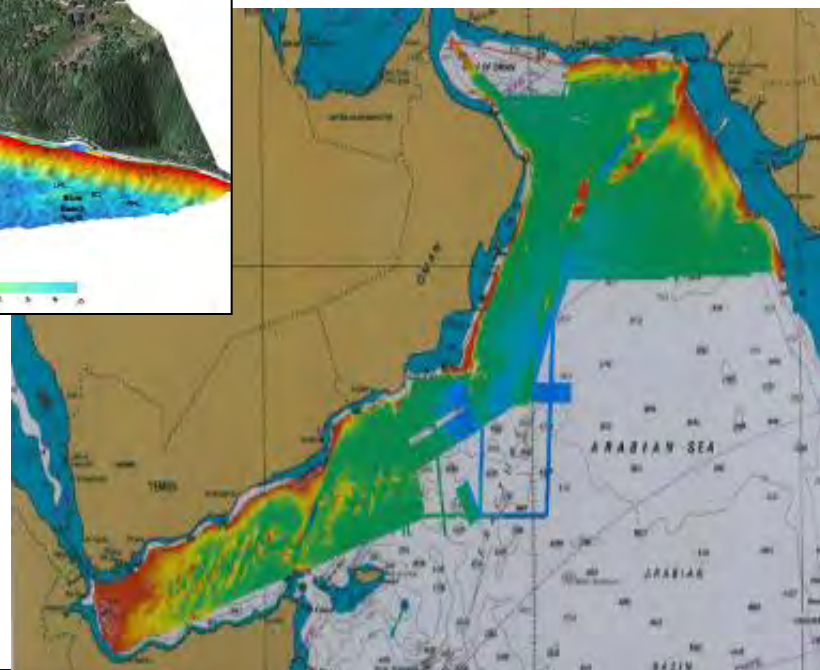

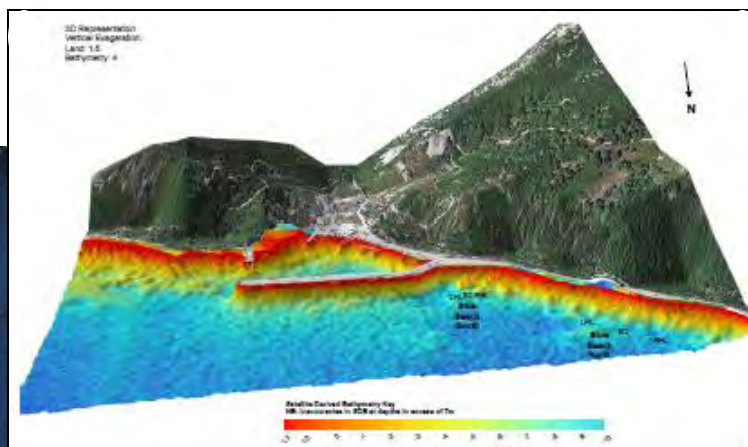

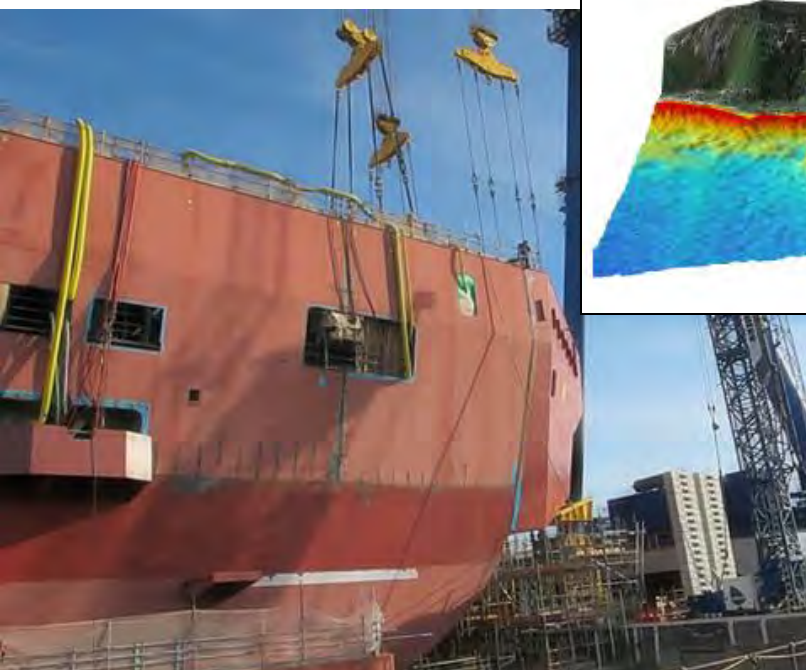

Quite a difference

So.....

Will it be 'good enough for Government work' in 2020?

Good enough Government work 2020

Battle-winning quality

Customer focus

Future force

Better than enemy

Defence data

In time

Sources

Sharing

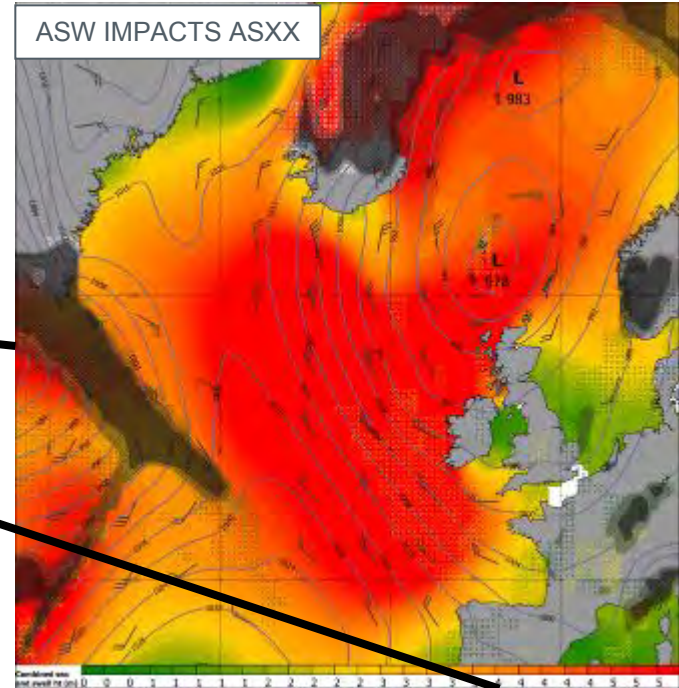

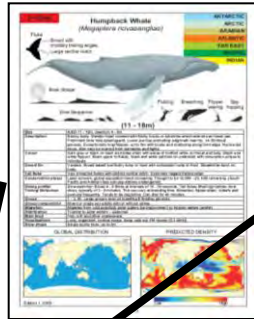

Training

Good to depth

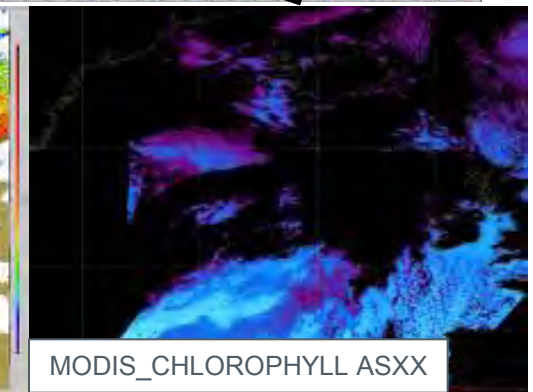

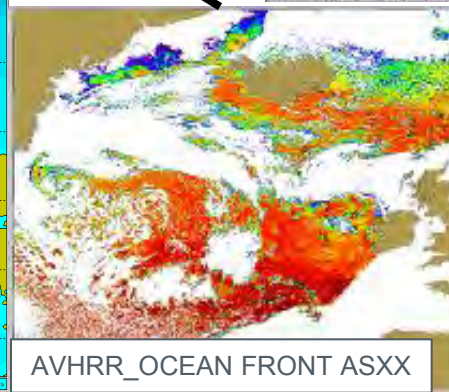

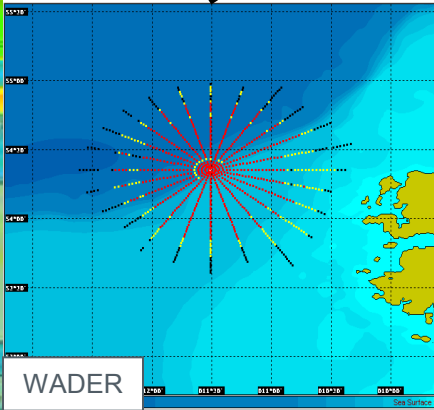

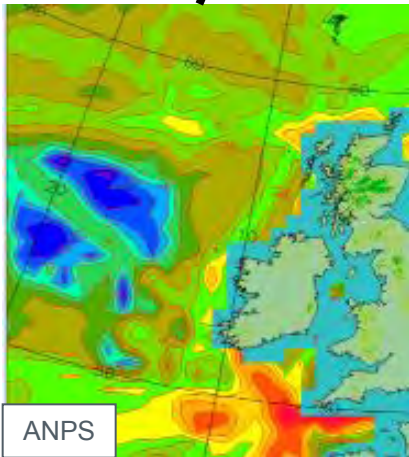

Legacy of data

Further change

Good government work but
